Test and Test Information Guide Development

Teacher Certification Testing

Since 1980 Florida teacher certification candidates have been required to pass the Florida Teacher Certification Examinations (FTCE), which consisted of tests in reading, writing, mathematics, and professional knowledge. The 1986 Florida Legislature modified the testing program by also requiring teacher candidates to pass a test in the subject area in which they wish to be certified. In addition, the Legislature substituted the Florida College-Level Academic Skills Test (CLAST) for the reading, writing, and mathematics portions of the FTCE. The 2000 Florida Legislature replaced the CLAST with the General Knowledge Test, effective July 1, 2002.

The subject area knowledge tested on the Professional Education examination was identified and validated by committees of content specialists from within the state of Florida. Committee members included public school teachers, district supervisors, and college faculty with expertise in this field. Committee members were selected on the basis of recommendations by district superintendents, public school principals, deans of education, experts in the field, and other organizations. In developing the test, the committees used an extensive literature review, interviews with selected public school teachers, a large-scale survey of teachers, pilot tests, and their own professional judgment.

Role of the Test Information Guide

The purpose of this test information guide is to assist examinees in preparing for the subject area test in Professional Education and identifying areas in need of further study. The guide was designed to familiarize prospective test takers with various aspects of the examination, including the content that is covered and the way it is represented. The guide should enable candidates to direct their study and to focus on relevant material for review. An annotated bibliography of related subject matter materials is available at the end of the test information guide to provide further guidance in identifying additional areas in need of study.

This test information guide is intended primarily for use by certification candidates, who may be students in a college or university teacher-preparation program, teachers with provisional certification, teachers seeking certification in an additional subject area, or persons making a career change to public school teaching. Candidates may have studied and worked in Florida or may be from out of state.
College or university faculty may also use the guide to prepare students for certification, and inservice trainers may find the guide useful for helping previously certified teachers prepare for recertification or multiple certification.

This test information guide is not intended as an all-inclusive source of subject area knowledge, nor is it a substitute for college course work in the subject area. The sample questions are representative of the content of the actual test; however, they are not actual test questions from an actual test form. Instead, the guide is intended to help candidates prepare for the subject area test by presenting an overview of the content and format of the examination.
Preparation for the Test

The following outline may help you prepare for the examination. Adapt these suggestions to suit your own study habits and the time you have available for review.

Overview

- **Look over the organization of the test information guide.**
  Section 1 discusses the development of the test and test information guide.
  Section 2 (this section) outlines test preparation steps.
  Section 3 offers strategies for taking the test.
  Section 4 presents information about the content and structure of the test.
  Section 5 lists question formats and includes sample test questions.
  Section 6 provides an annotated bibliography of general references you may find useful in your review.
  Section 7 identifies a source of further information.

Self-Assessment

- **Decide which content areas you should review.**
  Section 4 includes the competencies and skills used to develop this subject area test and the approximate proportion of test questions from each competency area.

Review

- **Study according to your needs.**
  Review all of the competencies and concentrate on areas with which you are least familiar.

Practice

- **Acquaint yourself with the format of the examination.**
  Section 5 describes types of questions you may find on the examination.

- **Answer sample test questions.**
  Section 5 gives you an opportunity to test yourself with sample test questions and provides an answer key and information regarding the competency to which each question is linked.
Final preparation

- **Review test-taking advice.**
  
  Section 3 includes suggestions for improving your performance on the examination.

- **Refer to field-specific references.**
  
  Section 6 includes an annotated bibliography listing general references keyed to the competencies and skills used to develop this subject area test.
Test-Taking Advice

- Go into the examination prepared, alert, and well rested.
- Complete your travel arrangements prior to the examination date. Plan to arrive early so that you can locate the parking facilities and examination room without rushing.
- Dress comfortably and bring a sweater or jacket in case the room is too cool for your comfort.
- Take the following with you to the test site:
  - Admission ticket
  - Proper identification as described in "Identification Policy"

- There are many strategies for taking a test and different techniques for dealing with different types of questions. Nevertheless, you may find the following general suggestions useful.
  - Read each question and all the response options carefully before selecting your answer. Pay attention to all of the details.
  - Go through the entire test once and answer all the questions you are reasonably certain about. Then go back and work through the questions that require more thought.
  - When you are not certain of the correct answer, eliminate as many options as you can and choose the response that seems best. It is to your advantage to answer all the questions on the test, even if you are uncertain about some of your choices.
  - After completing the examination, go back and check every question. Verify that you have answered all of the questions and that your responses are correctly entered.
4

Competencies and Skills and Test Blueprint

The table on the following pages lists the competencies and skills used as the basis for the Professional Education examination. These competencies and skills represent the knowledge that teams of teachers, subject area specialists, and district-level educators have determined to be important for beginning teachers. This table can serve as a checklist for assessing your familiarity with each of the areas covered by the test. The competencies and skills should help you organize your review. The test blueprint indicates the approximate percentage of test questions that will cover each specific competency on the exam.

**Competencies** are broad areas of content knowledge.

**Skills** identify specific behaviors that demonstrate the competencies.

**Percentages** indicate the approximate proportion of test questions that represent the competencies on the test.

The following excerpt illustrates the components of the table.

</table>
Test Format and Sample Questions

The Professional Education subject area test consists of approximately 120 multiple-choice questions. You will have two and one-half hours to complete the test.

Each question will contain four response options, and you will indicate your answer by selecting A, B, C, or D.

The table below presents types of questions on the examination and refers you to a sample question of each type.

<table>
<thead>
<tr>
<th>Type of Question</th>
<th>Sample Question</th>
</tr>
</thead>
<tbody>
<tr>
<td>Direct question</td>
<td>Question 1, page 14</td>
</tr>
<tr>
<td>Sentence completion</td>
<td>Question 2, page 14</td>
</tr>
<tr>
<td>Scenario</td>
<td>Question 3, page 14</td>
</tr>
</tbody>
</table>

Choose the response option that best answers the question.
Select the response option that best completes the sentence.
Examine a situation, problem, or case study. Then answer a question, make a diagnosis, or recommend a course of action by selecting the best response option.
Sample Questions

The following questions represent both the form and content of questions on the examination. These questions will acquaint you with the general format of the examination; however, these sample questions do not cover all of the competencies and skills that are tested and will only approximate the degree of examination difficulty.

An answer key follows at the end of the sample questions. The answer key includes information regarding the competency to which each question is linked.
DIRECTIONS: Read each question and select the best response.

1. What type of curriculum is a teacher using when students are confronted with a scenario and asked to generate hypotheses and solutions?
   A. program-based
   B. concept-based
   C. computer-based
   D. problem-based

2. An instructional strategy in which students work in small, peer-assisted groups is
   A. intentional teaching.
   B. project teaching.
   C. experimental learning.
   D. cooperative learning.

3. When a teacher reads aloud to students, which of the following strategies is the teacher using?
   A. modeled reading
   B. shared reading
   C. interactive reading
   D. guided reading

4. An elementary mathematics teacher uses the phrase “My dear Aunt Sally” to teach the order of operations. This phrase is an example of a
   A. mnemonic device.
   B. review device.
   C. clarifying tip.
   D. summarizing tip.
5. According to Bloom's taxonomy, what is the lowest level of question in the cognitive domain that the teacher could use?
   A. comprehension
   B. knowledge
   C. application
   D. analysis

6. To ensure that ALL students are aware of the assignments required for a semester-long chemistry class, the teacher should
   A. create a course outline and distribute a hard copy to each student.
   B. mail a letter to each parent, outlining the assignments and when they are due.
   C. post the assignments on the school Web site so each student can access the information.
   D. write the assignments on the board and ask students to copy them on their paper.

7. A student is capable of completing assignments but often lacks the motivation to do so. Which strategy would address the problem directly?
   A. creating an academic contract between the student and teacher
   B. giving additional credit for class participation and attendance
   C. monitoring the student closely during class
   D. sending weekly progress reports to parents

8. Which of the following is an example of a teacher employing a nonverbal communication strategy?
   A. granting a student a special trip to the media center for good work
   B. having one student explain a mathematics problem to another
   C. using a calm voice with two students involved in a heated argument
   D. using enthusiastic hand and eye gestures to introduce a unit on Florida history

9. To ensure that a new student feels welcome, the teacher should
   A. ask the new student to introduce himself and tell about himself.
   B. assign a responsible peer buddy to assist the new student.
   C. introduce the new student to the class briefly and move on.
   D. send home a class newsletter announcing the new student.
10. Which of the following situations is the best example of a teacher promoting a climate of openness, respect, and inquiry in the classroom?
   A. creating interest centers and interest groups in the classroom
   B. establishing a variety of levels of instruction in the learning environment
   C. developing curriculum that is consistent with students’ interests
   D. promoting student cultures that are studied, shared, and celebrated

11. A beginning teacher notices that students are having difficulty mastering the properties of light on a science test. The best next step for the teacher to take would be
   A. readministering the same test.
   B. seeking input from a peer teacher.
   C. grading the test on a higher curve.
   D. continuing to the next topic.

12. In a community-centered approach to teaching, a teacher plans classroom activities that require students to
   A. work independent of one another.
   B. determine individual learning goals.
   C. assist others in solving problems.
   D. post their progress publicly.

13. A teacher has students use their background information to make predictions about a story. This lesson would most likely be representative of a(an)
   A. knowledge-centered environment.
   B. learner-centered environment.
   C. assessment-centered environment.
   D. teacher-centered environment.
14. During the introduction of a new mathematics lesson, several students appear uninterested in the lesson. To determine if the behavior is content related, the teacher should
   A. send the students to the office.
   B. redirect student behavior.
   C. ask students concept questions.
   D. give students a written quiz.

15. A math teacher is in the initial stages of planning a unit. The teacher realizes homework will play an important role in student success. The teacher examines the following research table that displays the effectiveness of various approaches to assessing homework assignments. What approach to assigning homework will have the greatest positive impact on student performance?

<table>
<thead>
<tr>
<th>Use of Homework</th>

   A. assigning homework daily and reviewing the problems on the board
   B. assigning select problems and grading them with specific feedback
   C. assigning the odd number problems and grading them every night
   D. assigning homework daily and monitoring the class for completion

16. Students are given a demanding task and then asked to respond to that task orally, in writing, or by constructing a product. This type of evaluation is a(an)
   A. portfolio assessment.
   B. performance assessment.
   C. formative assessment.
   D. open-ended assessment.
17. Which of the following assessments would be best for comparing a student's knowledge with that of other students in the same grade level?
   A. teacher-made
   B. norm-referenced
   C. performance-based
   D. content-referenced

18. A 4th-grade team analyzes student test scores from the beginning and the end of the school year to determine whether to continue using the current core reading curriculum. Which of the following is the best type of assessment to use for this purpose?
   A. cognitive
   B. qualitative
   C. summative
   D. formative

19. A student appears to be struggling with a reading subskill after initial instruction. The teacher wants to find out what component of reading is hindering comprehension. Which of the following assessments would best aid the teacher?
   A. screening
   B. diagnostic
   C. progress monitoring
   D. outcome measure

20. Which of the following would help a teacher identify reasons why a student is misbehaving in class?
   A. anecdotal records
   B. attendance summaries
   C. discipline referrals
   D. student grades

21. After attending a reading workshop, a teacher realizes that the current reading strategies are not improving student academic achievement. The most appropriate next step is to
   A. align classroom activities with the school improvement plan.
   B. ask a grade-level team member for help.
   C. correlate reading strategies with the district curriculum checklist.
   D. request assistance from a reading coach.
22. A teacher wants to analyze areas of need in the curriculum. Which of the following would reflect the necessary data?
   A. anecdotal records
   B. student test records
   C. a teacher-made test
   D. a teacher's grade book

23. A teacher would like to encourage parents and guardians to be involved in their students' education. Which of the following strategies is the best way for the teacher to encourage diverse parents and guardians to come to the classroom for a cultural activity?
   A. Writing an article for the school newsletter asking parents and guardians to drop in at their convenience to discuss ideas on a cultural activity.
   B. Displaying posters inviting parents and guardians to meet with the teacher after school to plan a cultural activity for the class.
   C. Having students write a personal invitation inviting parents and guardians to attend a cultural activity during school.
   D. Asking the principal to develop a schoolwide cultural activity to be held in the evening for students and their parents and guardians.

24. When a student with a large bruise on their face is questioned by the teacher, the student says that they fell at home while playing. Having previously noticed bruises on the student, the teacher suspects that the child is being abused. The teacher is required by law to contact the
   A. abuse hotline.
   B. guidance counselor.
   C. school administration.
   D. social worker.

25. When parents request copies of software to use at home with their children, a teacher should consult
   A. acceptable use policy.
   B. school technology plan.
   C. site license guidelines.
   D. software use procedures.
26. Permitting students access to e-mails with attachments can be a potential danger to a school's network, because of
   A. fraudulent content.
   B. nonacademic context.
   C. pornography.
   D. viruses.

27. A class has students from various cultural backgrounds. The teacher notices that students of like cultures are exhibiting similar skills and knowledge that differ from students of other cultures. This could be due to the impact of cultural knowledge on
   A. language.
   B. habits.
   C. transfer.
   D. interactions.

28. Which of the following teaching strategies would best show sensitivity to English language learners' language challenges?
   A. displaying the students' uncorrected English work in the classroom.
   B. grouping students by their English knowledge and experience.
   C. encouraging safe times to use academic English in class.
   D. assigning students whose first language is English to tutor classmates.

29. A teacher is preparing students for a statewide assessment. The teacher asks the students to underline the bold type in the questions on the practice test. This test-taking strategy is known as
   A. rereading the entire text.
   B. recognizing the key words.
   C. eliminating the wrong answers.
   D. skimming through the passage.

30. A teacher instructs students to read a selection and then retell the information from the selection. The students are using the study skill of
   A. summarizing.
   B. clarifying.
   C. synthesizing.
   D. classifying.

Annotated Bibliography

The annotated bibliography in this section includes basic references that you may find useful in preparing for the exam. Each resource is linked to the competencies and skills found in Section 4 of this guide.

This bibliography is representative of the most important and most comprehensive texts pertaining to the competencies and skills for Professional Education. The Florida Department of Education does not endorse these references as the only appropriate sources for review; many comparable texts currently used in teacher preparation programs also cover the competencies and skills that are tested on the exam.

   Focuses on providing educators with the instructional tools to assist students in making the maximum learning gains in a student-centered environment through the use of explicit instruction: instruction that is systematic, direct, engaging, and success oriented. Useful for review of competencies 2, 3, and 8.

   Provides mainstream education teachers with the ESOL instructional tools to appropriate learning environments and effectively teach English language learners in their classrooms. Useful for review of competencies 1 and 7.

   Provides current and prospective teachers with the knowledge to effectively teach English language learners in their classrooms. Useful for review of competency 7.

   Prepares preservice teachers for entering the classroom with an overview of the teaching profession. Allows for the opportunity to develop personal perspectives and record professional growth. Useful for review of competencies 1, 2, 4, and 8.

   Provides research-based instructional practices to enhance classroom instruction. Useful for review of competencies 1, 2, 3, 4, and 8.

   Emphasizes the implications of incorporating technology into a classroom with diverse learners and introduces various adaptive/assistive technologies available for exceptional students. Useful for review of competency 7.

   Focuses on providing preservice and inservice teachers the tools to effectively teach school-age students essential reading skills. Useful for review of competencies 4 and 8.

   Presents effective discipline models that promote positive teacher-student relationships while establishing clear boundaries in the classroom. Useful for review of competency 2.

   Addresses concepts, policies and practices associated with the welfare of children and families. Useful for review of competency 1.
   Addresses teacher inquiry and how it relates to various aspects of the teaching profession. Useful for review of competency 5.

   Provides instructional strategies that have been empirically proven to promote improved student learning. Useful for review of competencies 1, 2, 3, 4, and 5.

   Provides instructional principles, practices, and methods to improve classroom instruction, as well as cultural implications for educating English language learners. Useful for review of competencies 1 and 7.

   Presents theories and resources to help educators understand language development, cultural diversity, and its impact on academic progress. Useful for review of competencies 1, 2, 3, and 7.

   Provides college professors with the instructional tools to teach future middle and high school teachers. Useful for review of competencies 1, 2, 3, and 8.

   Provides research-based methods for preventing and remediating reading difficulties. Useful for review of competencies 3 and 8.
   Contains background knowledge and framework as well as instructional implication and techniques to provide meaningful classroom experiences for exceptional students. Useful for review of competencies 1 and 2.

   Offers the latest research on literacy instruction and best practices. Useful for review of competencies 4 and 8.

   Presents research-based strategies for supporting English language learners' academic progress beyond the initial stages of English language acquisition through the use of scaffolding. Useful for review of competency 7.

   Focuses on the instructional implications of educating an English language learner. Useful for review of competency 7.

   Helps preservice and inservice teachers develop awareness of cultural and linguistic implications involving having English language learners in the classroom. Useful for review of competencies 7 and 8.

   Introduces educators to the concept of assessment and suggests effective ways to incorporate assessment into classroom instruction. Useful for review of competencies 3 and 4.
Explores ways in which educators can use assessment data appropriately to inform classroom instruction. Useful for review of competencies 4 and 5.

Provides future and current teachers with the knowledge to develop and implement effective teaching practices. Useful for review of competencies 1, 2, 3, and 4.

Covers effective classroom management strategies for preservice and inservice teachers. Useful for review of competencies 1 and 2.

Emphasizes the importance of educators as leaders and highlights ways in which educators can reach their full potential as leaders in the classroom and the community. Useful for review of competency 5.

Uses an integrated case approach to introduce beginning education students to the world of teaching as a profession. Useful for review of competencies 1 and 3.

Designed for college and university students. Provides effective teaching strategies for middle grades instruction. Useful for review of competencies 2 and 3.
   Promotes the use of culturally specific and research-based instructional practices to teach mathematics to a diverse student population. Useful for review of competency 1.

   Emphasizes the importance of assessment in informing classroom instruction and ways in which to use assessment data to enhance educational experiences. Useful for review of competencies 1, 3, 4, and 5.

   Provides effective teaching practices for classroom instruction, classroom management, assessment, and grading. Useful for review of competencies 1 and 3.

   Focuses on appropriate, research-based classroom management strategies for all grade levels. Useful for review of competencies 1 and 2.

   Focuses on differentiated instruction and research-based strategies to establish an inclusive classroom setting to support diverse learners. Useful for review of competencies 1, 3, and 4.

   Emphasizes effective classroom management strategies to support meaningful educational experiences for diverse learners. Useful for review of competencies 1, 2, and 3.
   Presents research-based literacy instructional practices for elementary-aged learners. Useful for review of competencies 1 and 8.

   Designed to prepare preservice teachers in developing and administering appropriate and effective classroom assessments to school-age children. Useful for review of competency 4.

   Helps educators master the appropriate skills to effectively assess their students. Useful for review of competencies 1 and 4.

   Addresses the implications of teaching children of early adolescence and provides effective and age-appropriate instructional strategies. Useful for review of competency 1.

   Provides educators with the knowledge to create effective classroom assessments and introduces appropriate methods for utilizing various methods of assessment to inform instruction. Useful for review of competencies 1, 3, and 4.

   Designed for preservice and inservice teachers and administration. Provides detailed instruction on how to develop interdisciplinary thematic units. Useful for review of competencies 1 and 8.

   Focuses on effective instructional practices for students with diverse learning needs. Useful for review of competencies 1, 2, 3, and 4.

   Provides strategies to differentiate instruction for diverse student populations to create meaningful educational experiences for all students. Useful for review of competencies 1, 3, and 8.

   Presents research-based instructional strategies to facilitate educational experiences and effective literacy instruction across the curriculum. Useful for review of competencies 1, 2, 3, and 8.

   Provides strategies to ethically and efficiently manage student behavior while allowing for meaningful educational experiences. Useful for review of competencies 1, 2, and 3.

   Focuses on cultural and intercultural communication as related to classroom instruction of English language learners. Useful for review of competency 7.
